1 FORMATION

the first time in history that the majority of the world's population has been born into a world where it is possible to live a decent life. The world is not perfect, but it is better than it was. This is a remarkable achievement, and it is something that we should be proud of.

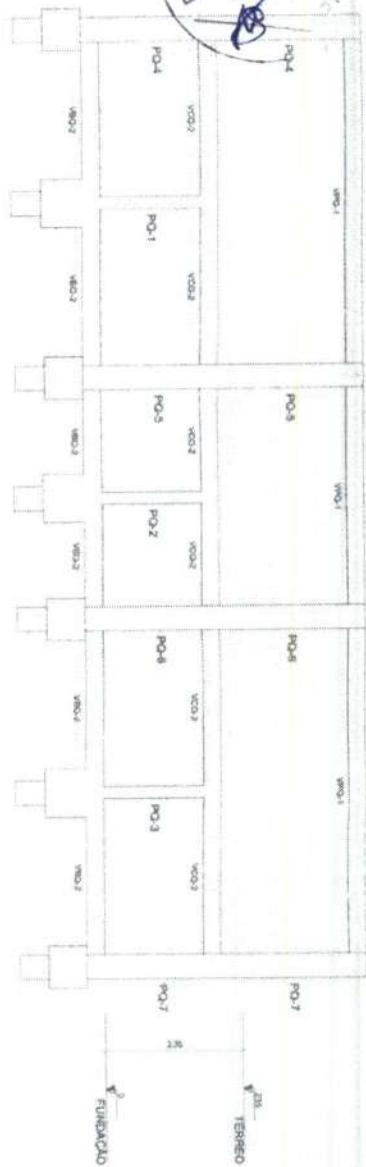

However, there are still many challenges ahead. We must continue to work towards a more sustainable future, one that respects the environment and ensures that everyone has access to basic necessities like food, water, and healthcare. We must also address the issue of inequality, which remains a significant problem in many parts of the world. By working together, we can build a better future for all.
